1. INTRODUCTION

IPEX PH232Ex1 bidirectional communication terminal server/client is a simple solution for connecting serial devices to a network which results in having 1 RS-232 serial port over Ethernet network. This converter uses transparent communicate protocol, so it is not required to understand complex Ethernet TCP/IP protocol, and no modification in serial programs is needed. It operates as a Real COM, TCP Server, TCP Client, UDP Server and UDP Client Full-Duplex converter and supports bidirectional connection.

PH232Ex1 is designed for industrial usage and is useful for connecting any device with a serial interface to a computer via Ethernet supported network like LAN, WAN ... and can be used in Industrial Automation, Telecommunications, SCADA Systems, DCS Systems

Protection against Surge, ESD and EMI is implemented in its design and there is 3kV insulation between Ethernet and RS-232 sides.
