RISH MAX 10

Rish MAX 10 economical digital multimeters are suited in radio and television service, training and education. They are of especially flat design, fit into any bag. The protective cover can be opened at an angle for convenient reading from the workbench.

- 3 ¾ digits 3999 counts, LCD display
- Basic Accuracy: $\pm 0.5\%$
- CAT I - 1000V / CAT II - 6000V (Safety Protection)
- AC/DC Voltage measurement upto 1000V.
- AC/DC Current measurement upto 10A.
- Resistance measurement: 40M Ω .
- Capacitance measurement: 1pF-200 μ F
- Frequency measurement: 500kHz
- Temperature measurement: 0-1300 °C (K-type)
- Continuity test, Diode test, Duty Cycle measurement
- Battery: 2 X 1.5V (600 Hrs)
- Weight with batteries: Approx. 0.25 Kg

Rishabh iYoung

The new Rishabh iYoung Multimeter are compact, Handy & Trendy models specially targeted for applications of Electrical contractors, Service Industry, Technicians, HVAC and also the education sector i.e., students who will be the future of tomorrow.

- Pocket size compact Multi-meter
- Non-Contact Voltage Detection
- Drop proof Multi-meter
- AC-DC Voltage measurement:-100 μ V ... 600V
- AC-DC Current measurement:-10 μ A ... 10A
- Resistance measurement:- 1 Ω ... 40M Ω with zero correction
- Frequency measurement:-10Hz ... 500kHz
- Diode measurement, Continuity testing
- Duty cycle (%) measurement, Data Hold
- Provision of mounting clips for hand free operation
- Relative measurement
- Battery (Service Life):- 2 X 1.5 V (400hrs)
- Weight with batteries:- Approx. 0.35 Kg

RISH 410

RISHABH 410 digital multimeter is suited for universal, general applications in the electrical and electronics fields for training and education. It is a compact design, that fits into pocket.

- Compact Pocket Fit Economical Design.
- Functionally Enhanced Dual Display
- Digital Display with 3¾ Digit, 4000 Count
- Basic accuracy:- $\pm 0.5\%$
- Measuring Category: CAT II - 1000V / CAT III - 600V
- Automatic Blocking System (ABS) for User / Device Safety.
- Measures AC/DC V & I, OHM, Diode, Capacitance, Frequency, Duty Cycle(%), Temperature(K-type), Relative measurement, Continuity test, etc
- Overload warning (>750V AC, >1000V DC, >10 A ACDC)
- Battery (Service Life):- 2 X 1.5 V (300hrs)
- Weight with batteries:- Approx. 0.48 Kg

RISH MIT 30

RISH MIT 30 is a Analog Digital Multimeter with resistance measurement which measures VAC, VDC, VAC+VDC, Frequency, mA DC, mA (AC+DC), Resistance, Continuity, Diode, Capacitance, AC Current measurement with clip on sensor and Insulation Resistance.

Digital Multimeter Cum Insulation Tester

- Insulation Resistance measurement up to 3G Ω
- Test voltages selection: 50V, 100V, 250V, 500V and 1000V
- Automatic Terminal Blocking System (ABS) for User / Device Safety
- TRMS Measurement regardless of Signal waveforms
- AC Current measurement up to 300A (with Clip-On sensor)
- Temperatures from -200 to 800 °C (PT 100 and PT 1000)
- Indication of negative values on the Analog scale
- Protection from Dust and Water: IP20 as per IEC60529
- International Safety standards: CAT II - 1000V / CAT III - 600V
- Battery (Service Life):- 6 X 1.5 V (300hrs)
- Weight with batteries:- Approx. 0.4 Kg

RISH Multi Series

RISH MULTI Series of Digital Multimeters are high accuracy, high safety range of Testing Instrument suitable for use in rough and harsh Industrial Environment, with unique features like Protective Rubber Holster, Automatic Terminal Blocking (ABS) System. RM series are available in 3 3/4 digit and 4 3/4 digit with RMS & TRMS measurements

- Different Models: RISH Multi 12S, 13S, 14S, 15S, 16S, 18S & New RISH Multi 20
- Basic Accuracy 0.02%
- TRMS measurement (Rish Multi 16S, 18S, Rish Multi 20)
- Automatic Terminal Blocking system for user safety
- Protective Rubber Holster for Rough Duty
- Backlit LCD Display, Analog Scale (Bar Graph)
- Min / Max value storage, Data Hold
- Power Economizing Circuit, Overload warning
- Computer Connectivity with attachable interface
- CAT III 1000V / CAT IV 600V
- Battery: 9 V Flat cell Battery
- Weight:- Approx. 0.48 Kg

Measurements

- DC Current / DC Voltage,
- AC Current / AC Voltage,
- Resistance,
- Capacitance,
- Frequency,
- Temperature,
- Continuity Testing,
- Diode Test,
- dB Measurement
- Event Counter,
- Event Duration,
- Stop Watch

Safety Features

High Precision Fuses,
Over Voltage Protection

Multi Purpose
Protective Holster

Automatic
Terminal Blocking

Digital Display

Analog Display

Data Logger

RISHABH 6k Series

RISHABH range of 6k series provide professional Multimeters which are used for measurement of Root mean Square (TRMS) Value of AC quantities regardless of wave forms.

Professional Multimeters

- Models: RISHABH 612, RISHABH 613, RISHABH 615, RISHABH 616
- Basic accuracy: 0.4%
- Available in 4 digits 6600 counts
- TRMS Measurement (RISHABH 616)
- Peak value measurement
- Dual Display Facility
- Supplied with Accredited Routine Test Certificates(Soft Copy)
- CAT III - 1000V / CAT IV 600V Protection
- 16A Current measurement in (RISHABH 613)
- 660A AC Current measurements with external clip on CT(RISHABH 612)
- % Duty Cycle measurement
- Temperature measurement(K type sensor)
- Frequency measurement upto 10MHz
- Battery: 2 X 1.5/ 600hrs
- Weight:- Approx. 0.48 Kg

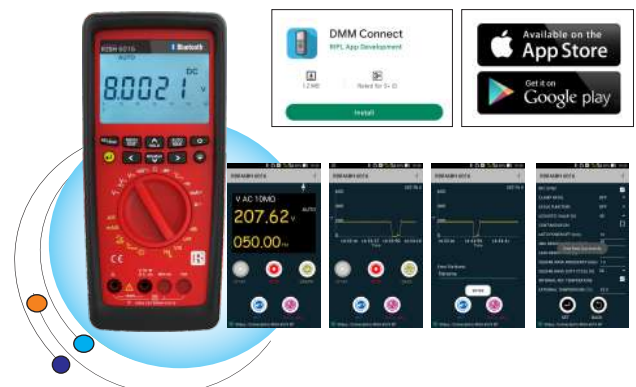

RISHABH 60k Series

RISHABH 60XX Series of multimeter are advanced high end range of instruments, meeting the need of today's technology with a Bluetooth communication and Android based Application for mobile phone. It is made for professional use that offer safety, High Resolution, Large range count, reliability ruggedness. A complete tool for Test Automation, equipped with more than 30 different measuring functions.

High-End Multimeters

- Models: RISHABH 6012, RISHABH 6013, RISHABH 6015, RISHABH 6016
- Basic accuracy: 0.05%
- Supports J, K, PT 100 & PT 1000 type sensors for Temperature measurement
- 60,000 counts True RMS measurement with high crest factors
- High bandwidth upto 100kHz for high frequency applications (RISHABH 6016)
- Facility of Square wave O/P with selectable Duty Hz & Duty cycle (RISHABH 6015 / 6016)
- Selectable clamp ratio for current measurement upto 6000A
- For measurement at VFD drives, special 1kHz LPF function is provided(RISHABH 6016)
- Pass/Fail with fully programmable GO-NO-GO
- 32,000 readings can be logged with RTC (RISHABH 6015 / RISHABH 6016)
- PC connectivity via a plug and play USB cable (Optional)
- Connect Mobile & PC via Bluetooth (Optional)
- Mains operation with power supply adapter (Optional)
- Battery: 2 X 1.5/ 100hrs (40 hrs for Bluetooth model with BT ON)
- Weight:- Approx. 0.5 Kg

Digital Multimeters

Functions		Rish Young	Rish Max 10	Rish 410	Rish Multi12S	Rish Multi13S

Rish Clip ON CT 1000/1A, 1000/5A, 300/0.3A

- Minimum transformation ratio error
- Transformer ratio of 200 : 1 in Rish Clip on CT 1000/5A and 1000 : 1 in Rish Clip on CT 1000/1A & 300/0.3A
- Compact and Handy design
- Class 1 accuracy
- 43 & 35 mm jaw opening/conductor diameter
- Protection of CAT III 600V
- Weight:- Approx. 650 gm

Clamp Meter

A **clamp meter** is a device that is used for measuring current with convenience and safety. It efficiently measures current without using any test leads. To measure current with a clamp meter, user need to place a cable/Busbar in the clamp meter's jaws. A magnetic field is formed when the current flows through the conductor. This device accurately detects the magnetic field to provide the corresponding current reading. Generally, the clamp meters perform just one job, i.e., measure current.

Exclusive Features

High Accuracy for low current measurement

Narrow housing for firm grip & easy to carry

Temperature from 0 to 1300°C using K type thermocouple sensors.

Measurement during night in darkness with user selectable Backlit

Double moulded Cover for soft touch and firm grip of the Instrument

1000V CAT III / 600 V CAT IV (as per IEC 61010-1- 2010)

IP20 Protection for terminals as per IEC60529

AUTO POWER OFF in order to save the power of the batteries

High user safety reach inconvenient places with easy view and comfortable operation

Measurement of AC-DC heavy Current along with multiple electrical parameters in the 1PH and 3 PH systems

Jaw size of
41 mm for clamp meters with current measurement upto 300/400A &
51 mm for clamp meters with current measurement upto 1000A

The applications of clamp meter includes

- Measurement of high value current in AC or DC Networks.
- Measurement of high value AC-DC Currents alongwith other electrical parameters measurement like Voltage, Resistance, Capacitance, Frequency, Temperature.
- Equipped with highly innovative design features which ensures high degree of safety and comfort for user.
- The applications of these meters mainly include Industrial Controls & Equipment, Commercial, Residential, Electrical systems & HVAC.

General Purpose Clamp Meters

RISH Clamp ES400AC / ES1000AC is a highly innovative design for features those increases safety and comfort of user. Clamp jaws can be opened or closed with the trigger placed at bottom side which are away from the jaws. This allows the user to place his/her hand at safer distance from live conductor. This greatly reduces exposure of human beings to electrical shocks.

Rish Clamp ES400AC / ES1000AC

- Current measurement upto 400A AC (Rish clamp ES400AC) & upto 1000A AC in (Rish Clamp ES1000AC)
- For RISH Clamp ES1000AC Jaw opening of 51mm for standard cable conductor
- Narrow housing for firm grip and easy to carry.
- Category protection upto 1000V CAT II / 600 V CAT III (as per IEC 61010-1- 2010)
- Battery:- 1.5 x 2 V AAA size, with Zinc Carbon cell appr. 200 Hrs, & Alkaline Manganese cell appr. 400Hrs
- Weight:- Approx. 0.6 Kg

Rish Clamp ES400A AC

Professional Clamp Meters

- Models: Rish Clamp 300A AC-DC / Rish Clamp 1000A AC-DC (3³/₄ digits)
- Large Jaw Opening
Rish Clamp 1000A: Jaw opening of 55mm for standard wire diameter of 50mm
Rish Clamp 300A: Jaw opening of 44mm for standard wire diameter of 40mm
- Narrow housing for firm grip and easy to carry.
- Temperatures from - 200°C to 800°C using PT 100 and PT 1000 sensors
- 1000V CAT III / 600 V CAT IV as per International Safety standard IEC 61010-1- 2001
- Protection from Dust and Water:- IP50 for Housing & IP20 for terminals (as per IEC 60529)
- Supplied with Carrying Case
- Weight:- Approx. 0.5 Kg
- Battery:- 9V DC, Minimum 220 hours (on Vdc, Adc), 80 hours (on Vac, Aac)

Rish Clamp 1000A AC/DC

High End Clamp Meters

- Models:- Rish Clamp Power 400A AC-DC / Rish Clamp Power 1000A AC-DC
- TRMS measurement
- Power Measurement in 1PH/2W, 3PH/3W & 3PH/4W balanced & unbalanced systems
- Measurement of Power parameters like Active, Reactive, Apparent Power
- Facility to measure Motor HP directly
- Harmonics measurement upto 49th Order & Individual THD measurement
- Energy measurement in Single Phase and Balanced Three Phase System
- For measurement at VFD drives, special LPF function is provided
- Bluetooth Connectivity (On request)
- Clamp meter with DUAL DISPLAY
- Non Contact Voltage Detection (NCV)
- Measurement of PF, DF, Crest factor, Phase angle
- Inrush Current / Peak Current measurement
- Weight:- Approx. 0.5 Kg
- Battery (life):- 9 V DC, Manganese Dioxide Cell or Alkaline manganese cell(48 Hrs Approx)

Rish Clamp Power
1000A AC/DC

Rish Clamp Solar

- Measurement range upto 1500V DC to check Solar Inverter Input Voltage
- Extended Current range upto 1500A AC (TRMS) / DC for measurement at high Current Carrying applications
- Patented rotational jaw feature so as to keep display in front in every situation
- Patented trigger at back side so as to keep a safe distance from loads and offer operational efficiency
- Double mould Casing to offer higher grip while holding the meter
- Consists of AC voltage upto 1000V (TRMS), Resistance, Continuity, Capacitance, Frequency, Diode, Duty Cycle, Temperature, etc. functions
- Complies with CE, IP 50, CAT IV 600V Protection
- Weight:- Approx. 0.6 Kg
- Battery:- 9 V DC, Manganese Dioxide Cell or Alkaline manganese cell
- Battery life:- Minimum 220 hours on Vdc, Adc, 80 hours on Vac, Aac.

Rish Clamp Solar

Insulation Testers use a high Voltage, low Current DC charge to measure the Resistance within wires and motor windings to identify Current leakage and faulty or damaged Insulation, which can lead to arc faults, blown circuits, and risk of electrical shock or fire. Megaohm meters are ideal for monitoring machine health and improving preventative maintenance efforts.

Exclusive Features :

- Selectable test Voltages upto 5kV(as per model)
- Upto 1TΩ Wide insulation resistance range
- Facility to discharge Capacitive circuits automatically
- Facility to operate on Mains, Battery and Hand crank(on request)

Rish Insu-10

- Insulation Resistance measurement from 10kΩ to 999MΩ
- Selectable Test Voltages 50V / 100V / 250V / 500V / 1000V
- Low Resistance measurement 0.01Ω to 99.9Ω
- Voltage Measurement <25V to 600V AC/DC
- Live Circuit Detection >25V irrespective of function selected
- Automatic Discharge of Capacitive circuits after Test performed
- Storage of Min/Max values
- Storage memory for last 50 readings
- Preselectable Measurement time for Insulation Resistance
- Continuity Testing with Programmable Threshold Resistance
- Stop Watch function, Blown Fuse Indication
- Auto Power OFF
- Power supply battery 6 x 1.5V Cells, IEC LR6
- Weight:- Approx. 0.50 Kg

1kV / 1GΩ Insulation tester

Rish Insu-20

1kV / 2GΩ Insulation tester

- Insulation Resistance measurement from 10kΩ to 2GΩ
- Selectable Test Voltages 50V / 100V / 250V / 500V / 1000V
- Low Resistance measurement 0.01Ω to 99.9Ω
- Voltage Measurement <25V to 600V AC/DC
- Optional: Connector jack for External Mains Adapter, 230VAC / 9VDC
- User Selectable Backlit Display
- Storage memory for last 50 readings
- Live Circuit Detection >25V irrespective of function selected
- Automatic Discharge of Capacitive circuits after Test performed
- Preselectable Limit Checks (Go / No Go option)
- Preselectable Measurement time for Insulation Resistance
- Lead Resistance Null facility for accurate measurement
- Stop Watch function, Blown Fuse Indication
- Auto power OFF, Low Battery Indication
- Power supply battery 6 x 1.5V Cells, IEC LR6
- Weight:- Approx. 0.50 Kg

Rish Insu 5000 A/AK/AKM/AKMR

- Models:- 5000A - (With Battery)
5000AK - (With Hand crank + Battery)
5000AKM - (With Hand crank + Battery + Mains)
5000AKMR - (With Hand crank + Mains+ Rechargeable Battery)
- Rugged 5kV Insulation Tester from state-of-the-art GERMAN TECHNOLOGY
- Insulation Resistance measurement from 10kΩ to 1TΩ
- Selectable Test Voltages 100V /250V /500V /1000V /1500V /2000V /2500V /5000V
- Test current is equal to 1mA at Test Voltage 100V, 250V, 500V & 1000V
- Voltage Measurement upto 2500V AC/DC
- Easy to read logarithmic scales with dual range
- Guard Terminal for elimination of surface Current
- Permanently connected Test leads with heavy duty insulation
- Green LED indicator for battery charge status
- Automatic Discharge of Capacitive circuits after Test performed
- Precheck of absence of voltages
- Electrical Safety: Protection Class II, IP 52
- Electromagnetic Compatibility (EMC)
- Applications: Insulation Measurement for Cables, motors, switchgear, Transformers etc.
- Re-chargeable Battery Operated or Crank Operated or Mains Operated(on request)
- Power Supply 6 x 1.5V as per IEC R20
- Weight: Approx. 3.4 Kg. (including Battery) & 4.5 Kg. (Including Battery & Mains Assembly)

HT 5kV Insulation Testers

Rish Insu 10Dx+

- Selectable short circuit Current 1.2mA, 3mA and 6mA
- Test voltage can be selected in steps of 10V from (100V to 1kV) & in steps of 25V from (1kV to 10kV)
- Insulation resistance measurement upto 20T Ω
- User selectable digital filters
- Noise Rejection upto 8 mA
- Operates on rechargeable Li-ion battery and Mains as well
- Bluetooth connectivity for data logging
- Touch screen TFT colour display
- Audio Read-out of measured insulation value
- Measurement of DC and AC voltages from 20V ~ 600V
- Three programmable timers
- Insulation leakage current measurement
- PI, DAR, DD, Step voltage & Ramp Test
- Weight:- Approx. 5Kg

10 kv / 20T Ω Insulation Tester

Rish Insu 5Dx+

5kV / 10T Ω Insulation Tester

A field insulation testing instrument

- Measurement up to 10T Ω & test voltages upto 5kV with 6mA short circuit current, to cater wide range of applications
- PI, DAR, SV/Ramp, DD, Burn/Breakdown test for diagnostic testing of various devices
- First ever Touch screen TFT color display & Audio readout of test results, making it highly user friendly
- Mobile app facility to operate instrument via Mobile enhancing safety
- Upto 8mA noise rejection for smooth, stable operation in noisy environment
- IP 67 (for close case) & IP 52 (for open case), CAT IV 600V protection
- Battery life:- 6 Hrs continuous testing at 5Kv 100M Ω
- Weight:- Approx. 5Kg

Rish Insu 5Dt

A perfect fit for all insulation testing needs

- First ever Touch screen TFT color display
- Test voltage in steps of 10V from (100V to 1kV) & in steps of 25V from (1kV to 5kV)
- User selectable digital filters & Three programmable timers
- Noise Rejection 8 mA
- Measurement of DC and AC voltages from 20V ~ 600V
- Insulation leakage Current measurement
- PI, DAR, DD, Step voltage & Ramp Test
- Connectivity with PC & Mobile to do analysis, operate instrument & enhance safety
- IP 52, CAT IV 600V protection
- Operation on Mains & Rechargeable Battery for use in any condition(Optional)
- Battery life:- 3 Hrs continuous testing (at 5kV 100M Ω)
- Weight:- Approx. 5Kg

5kV / 2T Ω Insulation Tester

Low Voltage Insulation Tester (PC body)

- Housed with robust PC material case which offers high ruggedness to the instrument
- Rated Voltages: 500V, 1000V; Insulation Resistance: 100M Ω , 200M Ω
- Option ITC: Continuity measurement (0 to 5K Ω)
- The compact instrument offers easy portability
- Self-powered (hand crank generator) instrument - So no battery required
- Easy to rotate generator with self-lubricating molded gears and oil impregnated bushes to eliminate mechanical maintenance
- Product design and performance in compliance to IS:2992
- World Class Aesthetics, for better user experience
- Weight:- Approx. 650 gm

Rishabh Test Leads

Flexible Leads

Fully Flexible Silicon Test Leads

Firm Connection

Sharp Tips

Crocodile Clips

4 mm spring engagement for Firm Connection

Ergonomically Designed

Silicon rubber cable offers high flexibility

High Thickness of Insulation for additional Safety

Low contact resistance for accurate measurements

Nominal voltage upto 1000V and current upto 16A

CAT II 1000V (with protective Caps CAT III 1000V/CAT IV 600V)

High Voltage Test 8kV AC, 50Hz for 1 Min @ 25 Deg.C

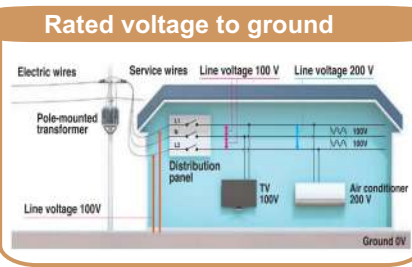

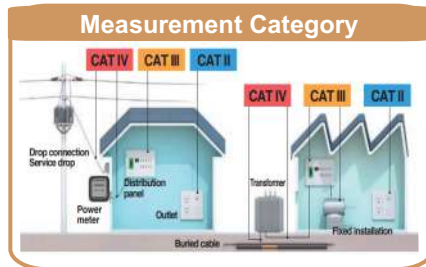

Applicable standards: IEC/EN61010-2-031

Plug and Play USB connectivity with PC

Measurement Category - Anticipated Transient

Under safety standards En61010 Series, measurement is classified into Categories II to IV according to the measurement point's rated voltage to ground, current capacity (size of current that flows in a short-circuit fault), etc., and the transient over voltage that occurs at the measurement point

CAT II : Measurement at a point from the power plug to the equipment's power circuits, where equipment is directly connected to an outlet

CAT III : Measurement at a point on the power distribution cabling or power supply circuits, or at a point from the distribution panel to a distribution terminal behind an outlet, where equipment (for example a fixed installation) takes electricity directly from a distribution panel.

CAT IV : Measurement at a point on a service drop to a building, or on the line from the drop connection to the power meter or distribution panel

Assuming 600 V for the measurement point's voltage to ground, a Category IV location could potentially include transient over voltage of 8000 V. Hence, CAT IV measurement instruments are designed to withstand transient over voltage of 8000 V. CAT III measurement instruments can only withstand up to 6000 V, so if 8000 V transient over voltage enters, it will cause insulation breakdown that could result in electric shock.

Anticipated Transient Overvoltage

Rated voltage to ground	Transient overvoltage		
	CAT II	CAT III	CAT IV
300 V	2500 V	4000 V	6000 V
600 V	4000 V	6000 V	8000 V
1000 V	6000 V	8000 V	1200 V
1500 V	8000 V	1000 V	1500 V
2000 V	1200 V	1500 V	1800 V

Power lines in factories and similar facilities will at times include transient overvoltage (impulse voltage) that is around 10 times the power source voltage. The transient overvoltage of the measurement points must be predicted in advance, and the instrument will need a safety design that will enable it to withstand such overvoltage.

Marks

CAT IV	600 V
Measurement category	Rated voltage to ground

Never measure a measurement point with a higher category number than the category indicated on the measuring instrument. Doing so could lead to a serious accident such as electric shock.

Product upgradations is a continuous process. Hence, data in this catalog is subject to change without prior r.
